Mirror 3.0

FALCO has launched a new line of product, Mirror Matt, into existence, providing a soft complementary product to Mirror Gloss. This state-of-the-art board provides a refined touch to every interior project, awakening the space with its graceful visuals and pleasant tactility. The hygienic surface has antibacterial properties and leaves no room for fingerprints.

Mirror Matt

- From the pristine touch of the virgin snow to the sheltering depth of the night sky, the matt finish captures the spirit of comfort in every design.
- Mirror Matt is an MDF board covered with an anti-fingerprint matting film on the front side, with the same design and a Pearl texture on the other side. The product is delivered with a protective foil on the front side, which should only be removed after assembly by the end-user.
- The anti-fingerprint, homogenous, tough surface is long lasting, has a high chemical and thermal stability, and can be easily cleaned with non-abrasive cleaning agents.
- The Mirror Matt MDF boards can be formatted by conventional saws and edged normally on standard edging lines.

Satin

Mirror Gloss

- Reflecting the light in a dazzling display, Mirror Gloss pushes the limits of depth and dimension, challenging the conventional concept of melamine facing.
- The glossy surface is the result of the increased pressing time and the gradual slow cooling of the surface.
- The boards can be processed on all conventional saws and can be edged on all standard edging lines.

Storage Instructions

The boards are to be kept in a clean, dry, and covered place. Let the material adjust to its ambient environment 72 hours before use within a room. It is suggested to store the product in the original packaging, on pallets. No extra load should be put on the flat surface.

Cleaning Instructions

It is recommended to use clean water, a moist cloth, or a light detergent cleanser like dishwashing liquid to remove stains from coffee, tea, oil, wine and the like. Any commercially available cleaners for plastic surfaces will suffice, whether they contain ionic or non-ionic detergents, but dilute them before use. Rinse the surface with clean water after cleaning and dry with a soft cloth.

Warning: The use of cleaning products and accessories with an abrasive surface, such as abrasive cleaners and cleaning polishes, as well as powerful acids should be avoided to prevent permanent harm to the surface and its qualities.
